Two other sons and a daughter arrived Sunday.—The residence of Mrs. Linda Benton and almost all the household effects was destroyed by fire Saturday afternoon, partly covered by insurance. This is a great loss to Mrs. Benton, not only from the standpoint of dollars and cents, but she had so many valuable keepsakes that money cannot buy, none of which was saved.—The little child of Mr. and Mrs. R. A FORECAST.

As the heading indicates it is a glance of the mental vision in the future. Of course it is a political forecast, a prophecy, as to the outcome of the scramble for presidential honors.

We usually look to "big men" political leaders for wisdom and knowledge along this line, and yet the "Near great" are not the truly great, and many of the so called "great men" have not approximated the "Near great" hence the result has been "blind lead the blind" in political matters with the spectacle of a skidding of the machine, and a tumble of "bosses," into the political ditch.

A HE O IN A LIGHTHOUSE.

For years J. S. Donahue, So. Haven, Mich., a civil war captain, as a lighthouse keeper, averted awful wrecks, but a queer fact is, he might have been a wreck himself, if Electric Bitters had not prevented. "They cured me of kidney trouble and chills," he writes, "after I had taken others so called cures for years, without benefit and they also improved my sight. Now, at seventy, I am feeling fine." For dyspepsia, indigestion, all stomach, liver and kidney troubles, they're without equal. Try them. Only 50 cts. at Chas. C. Davis.

What about the "Forecast"? Well, this may be said, of a party "A house divided against itself cannot stand."

That is truth recorded in holy unit. We judge of the future by the past and to the thoughtful reader of history, no truth is more universal in its application than this.

This prophet does not venture to predict who will be the republican or democratic nominee for president but we are likely to see some peculiar interest manifested in platform making this year and to reduce our prediction, to a guessing contest, there will be incorporated in both platform planks intended to mean "Revision".

We know in part what Hon. Woodson Wilson's views are on many of the leading questions of the hour as well as those of W. J. Bryan, La Follette, of Roosevelt, of Beveridge, of Clark and other presidential timber, but to guess again it's safe to say, that if the men named representing as they do both parties, were placed on a platform committee, there would be found practical agreement on 1.—Government control of public utilities, 2. Tariff revision "to the extent of a revenue basis, 3. Legislation to increase the scope and power of Inter-State-Commerce Commission (or court).

In conclusion mortal vision, is incapable of foretelling who will be nominated on either ticket for president nor what the result will be when the vote is taken. In a future article this writer desires to give a brief outline of Tariff history and another confined to a review of the Irrepressible conflict which led to the civil war.

14 below zero according to the most accurate thermometer has been the coldest, but that was enough to make all sit up and notice. Many years since we had any thing like as cold weather.

In Dec. 1911, W. M. Owens the Burr Merchant bought \$93.64 worth of eggs. During the year 1911 he bought \$978.40 and during the past six years has bought 1098 cases or 32940 dozen. They were from one egg up to six dozen at a time.

Dr. Michel as a vocal soloist, is an artist and has long since won the admiration of Mt. Vernon people. Wednesday evening's performance belongs in that of the high class of musical performances.

FAIR:—The prospects are very flattering that Mt. Vernon is to have a fair. A paper asking for subscription for stock was circulated Wednesday and at the time of going to press there were 51 subscribers for so many shares of stock at \$10 per share. The capital stock will be \$500 and it is the purpose of the promoters to sell that stock to local people or if other words let no one have one share. All who have subscribed for stock or who are interested in Mt. Vernon having a fair are requested to meet at the Court House next Tuesday evening at 7 o'clock when the organization will be perfected and the officers elected. There are left something over forty shares and anyone desiring a share of stock will please notify Chas. C. Davis or Roy Beasley Mt. Vernon. As to grounds and other details will be considered at the Tuesday night meeting.

Most anyone can be an editor. All the editor has got to do is sit at a desk six days out of the week, fifty-two weeks of the year and "edit" such stuff as this:

"Bill Jones of Brush Creek let a can opener slip last week and cut him in the putty."

"A mischievous lad of Livingston threw a stone and struck Mr. Pike in the alley last Tuesday."

"Cull McClure climbed on the roof of his house last week looking for a leak and fell striking himself on the back porch."

"While Harold Green was escorting Miss Violet Wise from the church social last Saturday night a savage dog attacked them and bit Mr. Green several times on the court square."

"Louis Miller of your town was playing with a cat Friday when it scratched him on the veranda."

"Tub Bullock, while harnessing a broncho last Saturday, was kicked just south of the corn crib."

A negro "blacksmith recently announced a charge in his business as follows:

Notice:—De copardnership heretofore resisting between me and Mose Skinner is hereby resolved. Dem what owe de firm will settle wid me, and dem what de firm owes will settle wid Mose."

A Nevada editor's note of thanks: "We have received a basket of apples from our friend, Gus Bradley, for which he will please accept our compliments, some of which are nearly six inches in diameter."

CASTORIA
For Infants and Children.
The Kind You Have Always Bought

Bears the Signature of J. C. Watson

The colt needs exercise.

Divide the hog pastures.

Have a sharp steel cutter on the plow.

Rich buttermilk means a poor but ter yield.

Provide some succulent food for ewes in winter.

Thorough and constant spraying is the price of good fruit.

After pruning clean up and have some bonfires right away.

It has never seemed advisable to sow alfalfa in the fall with rye.

Provide the tomatoes with a support of some kind—trellis or stakes.

A little pig loves sunshine and needs it almost as much as he needs food.

Better sires, better cows, better care and more prosperity is the inevitable result.

The gospel of clean milk is not a stiffer gospel, but a gospel of prevention.

Sows are always in better condition to raise fall pigs than they are in the spring.

Wash all parts of separator at end of separation and scald, leaving in the open air to dry.

In keeping cows never be without clover. It is one of the foods essential to good dairying.

In preparing either walnuts or butternuts for planting, the shucks should be left on over winter.

The late hatched chickens should have a grass run to themselves and be given extra feed and care.

A chill brought on by the sudden coming in contact with the frosty ground may ruin your best cow.

The individuality of each horse should be studied, and the foods supplied to meet individual requirements.

Don't let the buck run with the does when the breeding season is over, but confine him in a pen by him self.

Are there any old apple trees in your orchard, bearing desirable fruit? Try to graft good varieties upon them.

With good fence wire as cheap as it is today it is an easy matter to divide up the hog pasture into convenient lots.

All ewe lambs that are not desirable to raise as breeders should be given extra feed and sent back to the flock early.

Systematic training is of value in handling young colts; teach them one thing at a time, have them learn that one thing thoroughly.

Cold, exposed sleeping quarters that compel the sows to pile up in order to keep warm are usually responsible for the dead pigs at this time.

Fruit trees should be planted in regular rows in the orchard, or fruit garden, so thorough culture can be given both ways of the orchard.

Give the ewes the best possible chance to get them in high condition before breeding time. It means more and stronger and thrifter lambs.

Maple and ash posts will last about three or four years; excepting the very best quality of yellow ash, and it is too dear to be used as fence posts.

Mighty easy to feed new corn to the hogs, stalks and all, but you will find that if the corn is first run through the shredder the animals will eat it up clean.

Shocked corn accustoms cattle to the taste of ear corn, but compels them to eat so much roughage in connection that there is very little danger of over-eating.

Constipation is the cause of many ailments and disorders that make life miserable. Take Chamberlain's Stomach and Liver Tablets, keep your bowels regular and you will avoid these diseases. For sale by Chas. C. Davis.

ALL DRUGGISTS

THE SECRET OF LONG LIFE.

Do not sap the springs of life by neglect of the human mechanism, by allowing the accumulation of poisons in the system. An imitation of Nature's method of restoring waste of tissue and impoverishment of the blood and nervous strength is to take an alternative glyceric extract (without alcohol) of Golden Seal and Oregon grape root, Bloodroot, Sassafras and Mandrake root with Cherrybark. Over 40 years ago Dr. Pierce gave to the public this remedy, which he called Dr. Pierce's Golden Medical Discovery. He found it would help the blood in taking up the proper elements from food, help the liver into activity, thereby throwing out the poisons from the blood and vitalizing the whole system as well as allaying and soothing a cough. No one ever takes cold, unless constipated, or exhausted, and having what we call mal-nutrition, which is attended with impoverished blood and exhaustion of nerve force. The "Discovery" is an all-round tonic which restores tone to the blood, nerves and heart by imitating Nature's methods of restoring waste of tissue, and feeding the nerves, heart and lungs on rich red blood.

"I suffered from pain under my right shoulder blade also a very severe cough," writes Mrs. W. Dorn, of New Brookfield, S. C., to Dr. V. Pierce, Buffalo, N. Y. "I had four different doctors and none did me any good. Some said I had consumption, others said I would have to have an operation. I was bedridden, unable to sit up for six months and was nothing but a live skeleton. You advised me to take Dr. Pierce's Golden Medical Discovery and Dr. Pierce's Pleasant Pellets. When I had taken one bottle of the 'Discovery' I could sit up for an hour at a time, and when I had taken three bottles I could do my cooking and tend to the children. I took fourteen bottles in all and was then in good health. My weight is now 107 pounds."

Sell the poor cow.
Ewes need succulent feed.
The fall coat is nearly clear gain.
Fattening cattle should have plenty of salt.
Frost-bitten grass has no food value to speak of.
Both oats and barley are good feeds for young pigs.

See that the coops and henhouse is free from lice and mites.
Well cured ensilage corresponds with the nature of the cow.
The chief characteristics of the rooster are speed and stamina.

Horses that have a light hay diet are seldom affected with heaves.
Cleanliness and fresh air will usually prevent epidemics of any kind.

Testing is the only method by which we can cut out the robbers in the herd.

The brown ichorn or the hound fever quickly and soon reach maturity.

The colts and unused horses should spend most of each pleasant day in the paddock.

Have no hesitation in disposing of the unprofitable cows. They are a mistake.

Sheep do not drink much water, but what little they drink must be absolutely clean.

Corn fodder that is shredded or split, and ground fine, makes a very satisfactory feed.

Have an orchard hook and keep a record of the trees planted and also the variety of fruit.

Free range for hogs does not mean that they should be allowed to run over our neighbor's farm.

The late hatching eggs from some of the small quick-growing breeds can be raised at the least cost.

Do not sell all the best. If anyone is entitled to the best fruit produced on the farm, it is the family.

Pumpkins are a valuable succulence for cows, holding much the same place in the ration as silage and roots.

If you think of setting out an orchard and have had no experience, better hire a good man to show you how.

The practice of turning the cows on rye and winter barley that is sown for early spring feed is not a good practice.

The cream should always be strained into the churn through a fine wire sieve or a dipper, with a perforated tin bottom.

Well-bred heifer calves may often be purchased cheaply of people who live in town and keep but one cow for family use.

Ensilage is not considered good for sheep, and if it is fed at all it should be fed very sparingly and at intervals of two or three days.

Each cow's udder should be thoroughly cleaned before milking and the hands of the milker should be absolutely clean and dry.

Clean sound oats make an excellent ration for the pigs. If this is fed to them regularly during the fattening period the pork will be superior.

Stone fruits, such as peaches, apricots, plums and nectarines, should be planted the latter part of March, before the buds commence to swell.

Farmers who undertake to grow in any section of the country what nature does not intend them to grow soon find it out, and usually by hard experience.

It pays to have the farm fenced box tight and cross fenced into small fields and to have plenty of yards to keep hogs of different sizes and ages separated.

If a yearling ram is used watch him when first admitted to the flock. Sometimes they are not breeders. It is well to look after the old ones too. They sometimes quit.

The horse population of the world is estimated at more than 111,000,000, of which about 42,000,000 are in Europe, 28,000,000 in North America and 11,000,000 in Asia.

Plow up your old, worn-out orchard this fall and put some manure, compost, ashes and bones in the trenches. You'll be surprised next year at the quick response of your trees.

A daily record should be kept of each cow in the stable. In a year's time a dairyman will then know by practical demonstration what cows are paying him, and those that are not.

Pumpkins will freeze if you don't watch out, and frozen pumpkins are of no good to anything. Good ripe sound pumpkins are enjoyed by the cows, and help the milk flow very much.

NOTES from MEADOWBROOK FARM
By William Pitt

A silo is a necessity.
Provide free range for hogs.
Horses and mules are very fond of oat straw.
Every dairy should have a butter or milk standard.
Only the wealthy man can afford to keep a poor cow.
The horse is the only animal which every farmer must have.
Oats make an excellent ration for growing and breeding hogs.
Pedigreed stock, with animals, means known parentage on both sides.
Do not neglect to spray the orchard trees and berry bushes this year.
Every instant that milk stands in the stable it gathers contamination.
The silo helps solve the problem of making a profit from \$100 an acre land.
Do not allow a boss cow to nag a younger or smaller one. Separate them.
Do not place much faith in new feeds—you do not know what they are made of.
Beginners should not purchase large colonies of bees. Begin moderately and go slow.
In feeding a milk cow a corn ration, reduce the ration at first indication of fattening.
There are usually some cows that have served their days of usefulness and better be discarded.
Some of the out-crow corn ground can be sown to rye for late fall, winter and early spring pasture.

Young Women

Read what Cardui did for Miss Myria Engler, of Faribault, Minn. She says: "Let me tell you how much good Cardui has done me. As a young girl, I always had to suffer so much with all kind of pain. Sometimes, I was so weak that I could hardly stand on my feet. I got a bottle of Cardui, at the drug store, and as soon as I had taken a few doses, I began to feel better. Today, I feel as well as anyone can."

TAKE The CARDUI Woman's Tonic

Are you a woman? Then you are subject to a large number of troubles and irregularities, peculiar to women, which, in time, often lead to more serious trouble. A tonic is needed to help you over the hard places, to relieve weakness, headache, and other unnecessary pains, the signs of weak nerves and over-work. For a tonic, take Cardui, the woman's tonic. You will never regret it, for it will certainly help you. Ask your druggist about it. He knows. He sells it.
